

Lena Shaw STARS Academy

The first RBC after school program, Stars Academy began at Lena Shaw elementary in October 2009. Arts Umbrella and Mad Science partner with the district to provide world class service to vulnerable students.

Stars Academy is a structured educational after-school program that enhances academic achievement and develops students skills and interests in activities such as performing arts, visual arts, science, technology, and recreation.

The program goals are to develop students' self-efficacy, to increase their levels of academic achievement, skills, abilities and interests, and contribute to their cognitive, social, emotional health and well-being with an emphasis on keeping them in school.
